## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's prior art figure 1 in combination with Majid et al. (U.S. Patent # 5,852,550).

Applicant's prior art disclose the claimed invention (figure 1), including a DC power unit (figure 1, item 10), a microcomputer (figure 1, item 30), a first power converter (figure 1, item 40), a voltage regulator (figure 1, item 20), except the utilization of the technique for a second power converter and a switch. Majid et al. teaches the utilization similar technique for a second power converter and a switch (figure 2, item TR1, TR2, SW1-2 and 4). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Applicant's prior art by utilizing the technique taught by Majid et al. for the purpose of providing a switch mode power supply circuit which has a low power stand-by mode.
